

Hello, my name is Siena Rosetti. I am a mining engineering junior student at the University of Alaska, Fairbanks. In my schooling I attempt to go above and beyond, participating in many extracurricular activities, such as, SME (Society of Mining, Metallurgy, and Exploration) Student Mine Design Competition, Central Mine Rescue Competition, Pogo Mine UAV/UGV Underground Emergency Application, etc. I am also mine manager of Silver Fox Mine, in Fox, Alaska.

I have grown up in Fairbanks and was home schooled throughout my elementary and high school education. I enjoy being outdoors: hunting, fishing, snowmachining, horseback riding, and my most recent hobby of exploring old mining areas in interior Alaska.

I enjoy teaching kids about science and natural resources. I have participated in many groups and activities that have allowed me to do this including: SME Student Outreach, Alaska Miners Association, Alaska Resource Education, and Engineering Week at UAF.
